YOU'LL WIN GOING AWAY IN A FAN TRAVEL TRAILER

Travel to any wild location where wheels can go and your Fan brings the conveniences that let you fully enjoy the out-of-doors.

Fan has a beautiful exterior of durable aluminum in combinations of white and attractive colors. Smooth lines resulting from years of experience in designing travel trailers give Fan an exhilarating look.

Choose your own interior of maintenance free, vinyl laminated plywood, and brouse through our deluxe decorator book to select a color correct decor that is in perfect harmony with your taste.

How can you lose going away in a Fan?

JOIN THE INTERNATIONAL FAN TRAVEL CLUB

All Fan owners are welcome to join the Fan Trailer Club. Write to the Fan Trailer Club, LaGrange, Indiana 46761 for complete information, or simply send in your application found in all new Fans.

GOLD SEAL CONSTRUCTION

Every Fan carries the GOLD SEAL Emblem of Excellence. This emblem represents the most exacting standards in the industry, for construction, plumbing, heating and wiring.

RVI MEMBER

Fan is a member of Recreational Vehicle Institute helping promote better trailering through industrial cooperation and research.

The beautiful interiors shown here and the cover picture are of the 21′ Road Master.

"When it's finer — it's FAN!"

CHOOSE YOUR OWN BEAUTIFUL INTERIOR FROM FAN'S DECORATOR BOOK

SUPER-CENTER FRAME

Engineered for added strength to an already strong frame. A 3″ steel pipe from hitch ball to bumper is a super-center that makes your hitch stronger and your frame torqueless by adding strength in a new direction. You get great strength because nothing gives. (Standard all models except 15′ & 16′.)

THE HIDE-AWAY BUNK BED

A comfortable 40″ bed that folds up to the ceiling. It has a polyfoam mattress with zippered cover. Two windows give cross ventilation. The bunk raises and lowers easily. Optional.

THE BUBBLE ROOF

A bedroom in a bubble. Either front or rear depending on the model. Here's an inexpensive way to gain more headroom for a bedroom at little additional expense. (Optional.)

MOR/ryde SUSPENSION SYSTEM

Insures maximum stability, makes steering easier, absorbs shocks and equalizes the load. Rubber springs withstand extreme stress. (Standard on tandems and 21′ singles; optional on all 19′ and 17′ singles; not available on 16′ Low Liner.)

12-VOLT CONVERTER POWER KIT

A 110V AC-12V DC converter-charger that has no switches, on relays, no timers, no adjustments. Provides appliances with worry-free operation and has a 12V compressor that maintains 15 to 40 lbs. pressure in the water system. Also, a beautiful, battery wall clock is included. (Standard on 23′ and 26′.)
